

Lambrechts

keeping your production in line

SINCE

61

Lambrechts
more than 50 years
of dynamic entrepreneurship
right down the line

Three generations of experience and expertise combined with a love for the job have made the Lambrechts Group into a globally respected and privileged partner in the food and beverage industry.

For over 50 years, this family business - founded on passion, drive and the famous Flemish entrepreneurial spirit - has focused on innovation and customer satisfaction.

We honour our commitment every single day thanks to continuous investments in quality people and machines. In today's rapidly changing and challenging economic climate, these assets are more important than ever before.

**Future-proof with
a brand new keg line
of 500 kegs/h**

Brasserie Eco-Nature

Keg line 120 kegs/h including Flash and CIP installation for a complete brewery system

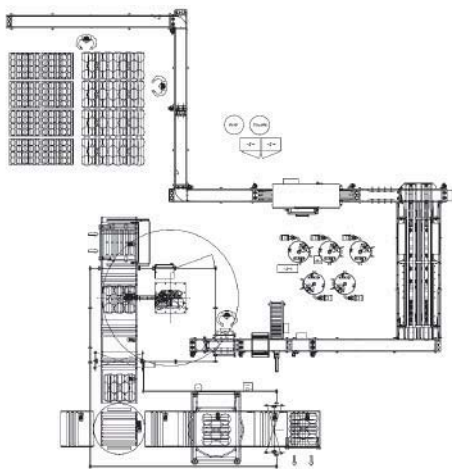

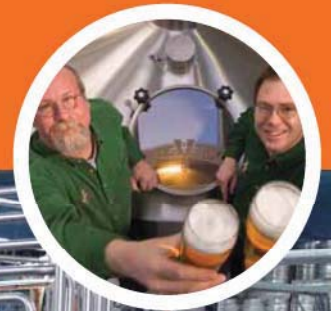

'Corsica, "the isle of beauty", is the unspoiled and unique setting for the Brasserie Pietra, which was founded in 1996 by Dominique and Armelle Sialelli. In love with their island and with beer, they felt that there should be a Corsican beer and decided to create one. They wanted to put a beer on the market that has its roots in the Corsican soil.'

Pietra - keg line 120 kegs/h

Fast growing US craft-brewer

- keg interior washing
- integrated hot water
- integrated detergent set
- integrated media connection
- integrated control system
- one stainless steel base frame
- size 20' container

plug & produce

Nano

the right start(er)

Semi-automatic keg washer

- 20 kegs/h
- comprehensive and sterile cleaning cycle
- steam sterilization or antiseptic treatment of kegs

Keg tracking

Integrating AEG transponders in your production line

Omni

combined filling head

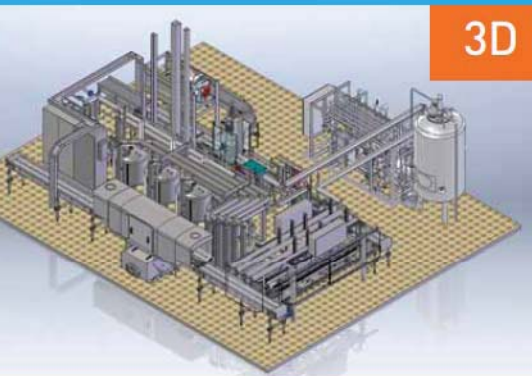

Combined filling head for one-way kegs with single wall or double bag

The single & dual head machine has been designed to automatically fill one-way or re-usable kegs that are loaded and unloaded manually at a high production rate.

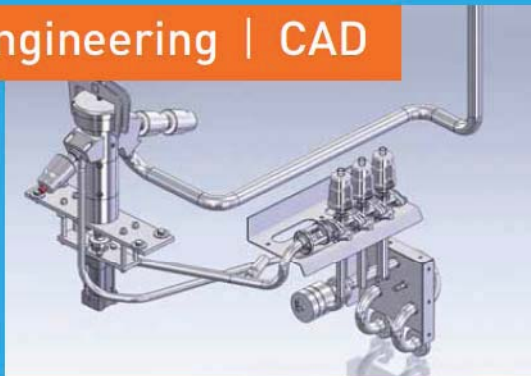

This system is capable of processing the complete range of one-way and re-usable kegs in 20 liter and 30 liter formats. In terms of output, the system allows the handling of 60 to 120 30 liter kegs per hour.

Why Lambrechts is a reliable partner:

3D engineering | CAD

F.A.T. | a standard procedure

Manuals | a practical maintenance guide

Services

- on-site audits
- modern connection with headquarters
- annual maintenance programs
- original spare parts
- training and formation of staff
- local assistance
